Volvo F88 and F89 at Work Patrick W. Dyer 2012-05 Volvo revolutionised heavy truck design in 1964 with the introduction of the L4951 Titan TIPTOP. The new model brought the principle of the tilting cab to Europe and provided the foundations for the F88 of the following year. Safe, comfortable, powerful and reliable: the F88 was everything that the competition was not. 'Driver appeal' as a concept was born. Furthermore, it arrived exactly when the rapidly expanding international haulage scene needed it most. The result: Volvo could not fail to make an impact. The F89, with more power, followed in 1970 and the UK only F88 290 was introduced in 1975. Over a twelve-year production life, Volvo built over 60,000 examples of the F88 and F89. This second edition of Patrick Dyer's book includes virtually all the photographs that were in the original publication and also contains 50 additional shots, many from the Volvo company archive. This has enabled Patrick to give greater coverage to the G88 and G89 models which were infrequent visitors to the UK. Patrick has also heavily revised and developed his text. The format of the book is larger than before, in keeping with his books on Scania, DAF and the Ford Transcontinental.

NASA Saturn V 1967-1973 (Apollo 4 to Apollo 17 & Skylab) David Woods 2016-08-01 Few launch vehicles are as iconic and distinctive as NASA's behemoth rocket, the Saturn V, and none left such a lasting impression on those who watched it ascend. Developed with the specific brief to send humans to the Moon, it pushed rocketry to new scales. Its greatest triumph is that it achieved its goal repeatedly with an enviable record of mission success. Haynes' Saturn V Manual tells the story of this magnificent and hugely powerful machine. It explains how each of the vehicle's three stages worked; Boeing's S-IC first stage with a power output as great as the UK's peak electricity consumption, North American Aviation's S-II troubled second stage, Douglas's workhorse S-IVB third stage with its instrument unit brain - as much a spacecraft as a rocket.

From the decision to build it to the operation of its engines' valves and pumps, this lavishly illustrated and deeply informative book offers a deeper appreciation of the amazing Saturn V.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
