Eccentric California Jan Friedman 2005 Jan Friedman's Eccentric America proved that the most unlikely events and landmarks could become tourist attractions. This new title is dedicated to the sheer lunacy of California and its citizens, covering the biggest, the best, the wackiest and weirdest of the state's people and places. From art-car and golf-cart parades to the Valentine's Day Sex Tour at the San Francisco Zoo; from a festival that moons Amtrak to a town with its own language; from obsessed collectors of Pez, yo-yos, and bananas to kitschy theme motels and a man who built a three-story mountain out of hay, adobe, and old paint. Eccentric California takes an in-depth look at one very peculiar place.

This guide features:

Survive the Fall Grace Hamilton Survival of the fittest becomes harsh reality in the blink of an eye. Greg Healy isn't fooled. The hunting trip is merely a ploy contrived by his wife and mother to force Greg and his father to end their estrangement. Not even Greg's teenage daughter or his father's hunting buddies along for the ride will be enough of a buffer to heal the rift of long-standing resentments. But the helicopter has barely dropped them in the remote Canadian wilderness when they discover their new equipment is dead with no explanation. Now they'll have to rely on each other and resort to Old West ingenuity to find their way home—before the hunter becomes the hunted. For seventeen-year-old Darryl Healy, things aren't much easier on his grandparents' cattle ranch. Not when his highly intelligent and successful mother keeps hounding him about college applications. But college quickly loses its allure when the lights go out after a cyberattack. Frightening responsibilities fall squarely on Darryl's unproven shoulders as a power-hungry politician is determined to confiscate the ranch's resources—by any means necessary. Danger and death await the Healy family as each group attempts to navigate this terrifying new post-apocalyptic world while the vast wilderness separates them. When deceit arises from within their ranks, they'll face threats as lethal as the grizzly bears and mountain lions lurking in the shadows. And in order to survive the nightmare, a deal with the devil might be their only saving grace.

Quest for Economic Empire Volker R. Berghahn 1996 German unification evoked ambivalent reactions outside its borders: it revived disquieting memories of attempts by German big business during the two world wars to build an economic empire in Europe in conjunction with the military and the government bureaucracy. But there are also high hopes that German finance and industry will serve as the engine of reconstruction in eastern Europe, just as it played this role in the postwar unification of western Europe.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since

studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

The Oil Man and the Sea Arno Kopecky 2013-10-19 A sailing trip along the proposed Northern Gateway marine route with a fresh new voice in non-fiction. With oil and gas behemoth Enbridge Inc.'s Northern Gateway proposal nearing approval, supertankers loaded with two million barrels of oil may soon be plying the waters from northern British Columbia down the wild Pacific Coast. This region is home to the largest tract of temperate rainforest on earth, First Nations who have lived there for millennia, and some of the world's most biodiverse waters—one spill is all it will take to erase ten thousand years of evolution. Arno Kopecky and his companions travel aboard a forty-one-foot sailboat exploring the pristine route—a profoundly volatile marine environment that registered 1,275 marine vessel

incidents—mechanical failures, collisions, explosions, groundings, and sinkings—between 1999 and 2009 alone. Neither Kopecky nor the boat's owner have ever sailed before, yet they brave these waters alone when their captain leaves them part way through the journey. Written with Kopecky's quick humor and deft touch, this is a rich evocation of a mythic place and the ecology, culture, and history of a legendary region with a knife at its throat.
