Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny,

and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the

same time.

The Power of Positive Thinking Norman Vincent Peale 2011-08 The Power of Positive Thinking is one of the most widely read and widely referenced books in Modern American History. It is so widely known that it has actually become part of the English Language. If somebody you know feels down and out and thinks that he just cannot do any thing right, what you say to him is: "Try the Power of Positive Thinking" or you might say, "Read Norman Vincent Peale." Here is what President Bill Clinton said upon hearing of the death of Norman Vincent Peale: The name of Dr. Norman Vincent Peale will forever be associated with the wondrously American values of optimism and service. Dr. Peale was an optimist who believed that, whatever the antagonisms and complexities of modern life brought us, anyone could prevail by approaching life with a simple sense of faith. And he served us by instilling that optimism in every Christian and every other person who came in contact with his writings or his hopeful soul. In a productive and giving life that spanned the 20th century, Dr. Peale lifted the spirits of millions and millions of people who were nourished and sustained by his example, his teaching, and his giving. While the Clinton family and all Americans mourn his loss, there is some poetry in his passing on a day when the world celebrates the birth of Christ, an

idea that was central to Dr. Peale's message and Dr. Peale's work. He will be missed.
