Composition in the Classical Tradition Frank J. D'Angelo
1999 Composition in the Classical Tradition borrows from late antiquity a series of composition exercises called the progymnasmata to teach the art of persuasion. The

exercises apply an understanding of the invention and composition of arguments from ancient rhetoric to a writer's own forms of persuasive communication. This book is structured to provide an effectively graded sequence of exercises, manageable at each step, from the simple to the more difficult and from the concrete to the abstract, within an explicit rhetorical framework. Learn how to compose an essay or a speech by first becoming proficient at its parts. *Composition in the Classical Tradition* features a variety of ancient forms: myths, historical episodes, descriptions, fables, proverbs, anecdotes, and speeches for readers to enjoy while learning how to write and speak persuasively. For anyone interested in composition and classical rhetoric.

American Military History Volume 1 Army Center of Military History 2016-06-05 American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number

of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

The Historical Archaeology of Virginia from Initial

Settlement to the Present Clarence R. Geier 2017-02-10

The book includes six chapters that cover Virginia history from initial settlement through the 20th century plus one that deals with the important role of underwater archaeology. Written by prominent archaeologists with research experience in their respective topic areas, the chapters consider important issues of Virginia history and consider how the discipline of historic archaeology has addressed them and needs to address them . Changes in research strategy over time are discussed , and recommendations are made concerning the need to recognize the diverse and often differing roles and impacts that characterized the different regions of Virginia

over the course of its historic past. Significant issues in Virginia history needing greater study are identified.

User Localization Strategies in the Face of Technological Breakdown Isidore Kafui Dorpenyo 2019-08-20 This book examines Ghana's use of the fingerprint biometric technology in order to further conversations about localization championed by technical communication scholars. Localization, in this case, refers to the extent to which users demonstrate their knowledge of use by subverting and reconfiguring the purpose of technology to solve local problems. Dorpenyo argues that the success of a technology depends on how it meets the users' needs and the creative efforts users put into use situations. In *User Localization Strategies in the Face of Technological Breakdown*, Dorpenyo advocates studying how users of technological systems construct knowledge about the technology and develop local strategies to solve technological breakdowns. By analyzing technical documents and interview transcripts, the author identifies and advances three user localization strategies: linguistic localization, subversive localization, and user-heuristic experience localization, and considers how biometric systems can become a tool of marginalization.

The Colonization of North America, 1492-1783 Herbert Eugene Bolton 1920

Madison County Trish Crowe 2011 This fertile and beautiful land, with its small rivers and valleys and surrounding mountains, was designated Madison County in 1792. The county was named for the family of James Madison, fourth president of the United States and the father of the Constitution. His family ran a mill on the Rapidan River, which is now located in the southern section of Madison County. Early in the 18th century, descendants of English and French colonials settled the southern sections of the county, and Quakers and German Lutherans settled the northern sections. Madison County's first church, Hebron Lutheran, was built in 1740, and its public church school was opened in 1748. Archaeologists have gathered evidence that Native Americans hunted and gathered in the region thousands of years earlier.

Abnormal Psychology and Life: A Dimensional Approach
Christopher A. Kearney 2011-01-01 Chris Kearney and Tim Trull's ABNORMAL PSYCHOLOGY AND LIFE: A DIMENSIONAL APPROACH provides students with a

concise, contemporary, science-based view of psychopathology that emphasizes the individual first. Through consistent pedagogy featuring clinical cases and real first-person narratives, the text illuminates our understanding that abnormal behavior can be viewed along a continuum. By highlighting this widely accepted dimensional view which places the behavior of an individual at the forefront of clinical definition, assessment, and treatment the text's goal is to foster personal relevance for students and encourage them to become intelligent consumers of mental health information. The book also gives students a comprehensive understanding of the features and epidemiologies, risk factors and prevention, assessment and treatment, and long term prognosis and associated stigma of mental disorders. Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of

the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
