Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Sewing for Fashion Designers Anette Fischer 2015-04-06 This comprehensive guide explores the fundamental sewing methods fashion designers need and teaches professional garment construction. Chapter One introduces sewing tools and machinery (including industrial machines). It discusses how to work with patterns and explains cutting-out methods. Chapter Two is devoted to different fabrics and how they work, focusing on the construction of a garment, including fastenings and trimmings, and the use of materials to support structured pieces, such as corsets. Hand-sewing techniques and basic seams are explored in Chapter Three. Techniques are demonstrated with step-by-step photographic guides combined with technical drawings. A guide to making garment details and decorations, such as pockets, waistlines, and necklines, is found in Chapter Four. Chapter Five addresses fabric-specific techniques, for everything from lace to neoprene. The best technical approaches to use for patternmaking and construction are discussed for each fabric. Catwalk images demonstrate how these kinds of techniques are employed by designers.

Serger Repair for the Home Sewer Reuben O. Doyle 2016-12-21 Do it yourself Serger machine repair!!! Sound like a far fetched idea? Not so, according to Reuben O. Doyle, a sewing machine repairman of 25 years and author of "Serger Repair for the Home Sewer." "In over 75% of the repair jobs I get, the home sewer/crafter could easily have handled the job if only they'd known what to look for. In about 25% of the repair jobs I go out on, the problem is such a minor one that anyone with a checklist of what to look for could fix it in seconds, but I have to charge them the same service fee as on any repair job. Of course any broken parts need to be taken to an authorized service repairman for repair or replacement, but those types of service calls are by far the minority!" Written in step by step instructional style, this book takes the serger machine owner through problem/solution scenarios allowing them to fix problems that can cause a lot of frustration for those who sew. Whether you have an older model machine, or one of the newer models, this book will help keep your general repair costs to a minimum. The home sewer can now just look up the problem in this handy guide book and follow the instructions on how to fix it. YES, it's now as easy to fix your serger machine as picking up a book!

The King Records Legacy: Acts I, II, III University of Cincinnati School of Architecture 2022-03-29 King Records was an independent recording studio, founded in 1943 in the Evanston neighborhood of Cincinnati, Ohio. It was at one point the sixth largest record company in the United States, representing artists such as James Brown, Bonnie Lou, The Stanley Brothers, and Otis Williams and The Charms. Though the company closed in 1971, the site still stands, and was even given a historical marker by the Rock and Roll Hall of Fame in 2008. The Cincinnati musical community and the Evanston neighborhood community wished to revitalize and restore King Records' legacy, leading the University of Cincinnati's School of Architecture and

Interior Design to participate in a design studio experience to research King Records' history and to submit design proposals to repurpose the King Records site. The resultant illustrative documentation is captured in *The King Records Legacy: Acts I, II, III*, providing an encapsulating history of King Records' influence in America's mid-twentieth century music culture, as well as the visions of eight renovation design proposals for the King Records historic site. *The King Records Legacy: Acts I, II, III* gives an account of the semester-long immersive study by fourth-year architecture and interior design students to decipher the racially divided mid-twentieth century social culture and the emergence of King Records as a unique melting pot of diverse artists and musical genres of early American vernacular pop music. Next, the students translate their findings into cohesive architectural proposals for a musical community center. Eight design proposals produced by eight collaborative teams map out visions for renovating the historic King Records site to a community venue offering a view of King's historic position in contemporary music history and a facility for music education and the promotion of musical arts.

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Signs of the Time R. C. Jette 2020-02-05 Christian, are you aware of the signs of the time? Are you properly reading them? Or are you accepting what is taught without Holy Spirit revelation?

This book is to help you investigate the whole of Scripture and not pull out a favorite verse, or the belief taught by your denomination, family, preacher, etc. It's time to reevaluate what is believed. What do you believe? Why do you believe it? Were you taught it by man? Was it Holy Spirit revelation? You need to study God's word to know whether what you hear is being interpreted in light of all Scripture, or if there's error in the teaching which could lead you astray. It's your responsibility to recognize false doctrine and not follow it. It's imperative to pay attention to signs. Incorrect reading can lead to wreckage. Christ is not coming back for a lukewarm, compromising, deceived, or marshmallow bride. The bride of Christ will be those who have correctly read and understood the signs of the time as revealed in Scripture and have come through the refiner's fire as gold!
