Iran Homa Katouzian 2013-06-01 World-renowned Iranian expert Homa Katouzian presents the first comprehensive introduction to one of the world's most controversial and misunderstood countries Since the 1979 revolution, Iran has been locked in conflict with the United States and Europe. Personified in the West by a series of bogeymen from Ayatollah Khomeini to Mahmoud Ahmadinejad, this villainous mask obscures a far more complex identity, forged by a vibrant and chaotic history. Revealing the country's true face, acclaimed expert Homa Katouzian delves deep into Iran's past, exploring how an ancient civilization at a crossroads of diverse dynasties and religions grew to become an ethnically, linguistically, and culturally rich nation. Centuries of arbitrary rule and revolution – from the first Persian empires to the Green Movement – are brought to life as Katouzian offers fresh insight into this fascinating country. Asking where its future may lie post–Arab Spring, this is the perfect primer for understanding a country characterized by constant flux and controversy.

Music Ivan Hewett 2003-01-01 The word 'music' in the early 21st century means many things. It means Mozart in the elevator, 50s pop songs on TV adverts, Finnish folk songs on Nokia 'phones. It means inflammatory Serbian nationalist song, ancient Coptic Church chant, Berlin electronica, Wynton Marsalis. Given this bewildering abundance, how we can speak of a single thing called 'music'? This book will argue that we can. More than that, it will argue that a vast area of cultural practice is at risk of vanishing behind the deafening roar of all those dead simulations of music that fill the airwaves. In this passionately argued and convincing book Ivan Hewett re-claims the unique place of music should have in our culture in its own right.

Joy For Beginners Erica Bauermeister 2011-06-09 From national bestselling author of Reese Witherspoon's Book Club pick *The Scent Keeper* comes a beautifully crafted novel about daring to experience true joy, starting one small step at a time. Having survived a life-threatening illness, Kate celebrates by gathering with six close friends. At an intimate outdoor dinner on a warm September evening, the women challenge Kate to start her new lease on life by going white-water rafting down the Grand Canyon with her daughter. But Kate is reluctant to take the risk. That is, until her friend Marion

proposes a pact: if Kate will face the rapids, each woman will do one thing in the next year that scares her. Kate agrees, with one provision—she didn't get to choose her challenge, so she gets to choose theirs. Whether it's learning to let go of the past or getting a tattoo, each woman's story interweaves with the others, forming a seamless portrait of the power of female friendships. "Joy for Beginners takes us on the emotional journeys of seven women seeking to transform their lives, and proves that sometimes what we really need to inspire us to change is a good, firm shove."—Garth Stein, author of *The Art of Racing in the Rain*

Rifts in Time and in the Self Cheryl Dueck 2004 The fall of the Berlin Wall in November 1989 marked the end of East Germany's socialist regime and a new beginning for a unified German Federal Republic. Cultural historians agree that the event caused one of the deepest rifts in time and thinking seen by an entire generation of Germans--a rift that left its mark on the psyche of every citizen, challenging notions of the personal and the political, and crashing traditional understandings of the individual and the collective self. In this bold rethinking of the question, Cheryl Dueck goes beyond the social, political, and psychological discourses that Marx and Freud, Foucault and Lacan viewed as the initiators of modern (socialist) identities to explore the literature and discourse of the quest for unity of the female subject. Reading such authors as Christa Wolf, Brigitte Reimann, Helga Königsdorf, and Helga Schubert, Dueck traces the striking fissures which run through time and through the female self, haunting women within the socialist project. The book shows how two generations of women writers have struggled consciously and systematically in their letters, aesthetic writings, and literary production to create a new language to express their own sense of self within a restrictive socialist and patriarchal system. *Rifts in Time and in the Self* offers an unprecedented look at the reconceptualizations of the female subject during several phases of GDR history, and women writers' persistent attempt to carve out spaces of identity and community.

The Future of Digital Business Innovation Vincenzo Morabito 2016-03-05 This book identifies and discusses the main challenges facing digital business innovation and the emerging trends and practices that will define its future. The book is divided into three sections covering trends in digital systems, digital management, and digital innovation. The opening chapters consider the issues associated with machine intelligence, wearable technology, digital currencies, and distributed ledgers as their relevance for

business grows. Furthermore, the strategic role of data visualization and trends in digital security are extensively discussed. The subsequent section on digital management focuses on the impact of neuroscience on the management of information systems, the role of IT ambidexterity in managing digital transformation, and the way in which IT alignment is being reconfigured by digital business. Finally, examples of digital innovation in practice at the global level are presented and reviewed. The book will appeal to both practitioners and academics. The text is supported by informative illustrations and case studies, so that practitioners can use the book as a toolbox that enables easy understanding and assists in exploiting business opportunities involving digital business innovation.

The Rift V. Y. Mudimbe 1993 *The Rift* explores textuality, writing, solitude, and death in the context of contemporary African life, and at the same time examines the constitution and materiality of African subjectivity. V. Y. Mudimbe's writing is provocative, demanding, and distinctly modernist. In its compelling exploration of the production of African knowledge within or outside the interstices of imperial space, *The Rift* contributes significantly to contemporary debates about the liminal subject split - to use Homi Bhabha's phrase - "between the here and the there" - and most important, about issues of power and post-colonial epistemology.

Hamas Transformation Ibrahim Natil 2015-10-28 This book examines the political development and transformation of Hamas from a resistance movement into a political authority in the Gaza Strip, as a result of the group's victory in the Palestinian national elections of 2006. From a political science and conflict transformation perspective, it focuses on the political opportunities, challenges and process of environmental and structural change which led the resistance movement to evolve from an underground militant group to a force in conventional politics. This study offers an analysis of Hamas' formation, development, political and strategic transformation, and the organisational structure shifts required by the transition. Through the adoption of a peace studies perspective, *Hamas Transformation: Opportunities and Challenges* also explores the political changes made by Hamas, including the structural alterations that took place within Palestinian society in the Gaza Strip as a result of the group's transition into political authority. This transition occurred despite the military takeover of the Gaza Strip by Hamas in 2007, and the Israeli military operations in 2009, 2012 and 2014. Additionally, the book also examines the new dimensions and phases of Hamas' political development after its victories in the elections, Palestinian division and the setbacks of the Arab Spring. Offering a range of views regarding the experiences of Hamas in governance, the book concludes with an in-depth illustration of Hamas' mixed strategy and tactics of governance and resistance.

Reforming Law Reform Michael Tilbury 2014-01-01 As a special administrative region of China, Hong Kong has its own legal system rooted in the common law. Reforms to this system take into account Hong Kong's unique conditions as an international city and draw widely on practices around the world. Since 1980, recommendations from a Law Reform Commission, chaired by the Secretary for Justice, have resulted in comprehensive revisions in key areas of law, ranging from commercial arbitration and interception of communications to divorce and copyright. Recently, however, the government has been slow to act on the Commission's recommendations. Questions have also arisen about whether the Commission — under-resourced, part-time and

government-led — can really meet the needs of an increasingly sophisticated society. Is law reform itself also in need of reform? This collection of essays by distinguished experts from around the world seeks answers to the question. The book explores the varied experience of law reform in Hong Kong and other common law jurisdictions and makes recommendations for strengthening the process of law reform both in Hong Kong and elsewhere. Michael Tilbury is Kerry Holdings Professor in Private Law in the Faculty of Law, the University of Hong Kong. Simon N. M. Young is a professor in the Faculty of Law, the University of Hong Kong and was formerly Director of the Centre for Comparative and Public Law. Ludwig Ng is a partner in ONC Lawyers, Hong Kong. "This important book should be a wake-up call to lawmakers in Hong Kong and beyond on the urgent need for effective law reform. It is especially important for Hong Kong whose competitive advantage is being harmed by institutional paralysis and official lethargy. The editors' modest recommendations deserve urgent action by Hong Kong's governors to bring up to date its archaic and outmoded legislation." —Lord Lester of Herne Hill, QC "Law reform is essential, especially in these fast-changing times. The law reform agency plays an important role in this process. This work examines the experience of the agency in Hong Kong and elsewhere and discusses how its effectiveness can be enhanced. This valuable contribution deserves to be read." —The Hon. Andrew Li, Chief Justice of Hong Kong, 1997–2010 "This is probably the first collection in Hong Kong of writings on law reform, examining clinically how law reform is, and can be processed with reference to other law reform institutions, in the pursuit of effectively meeting the often shifting needs of society and economy. Important chapters on reform of different areas of law are also included in this book. The editors and contributors are to be congratulated for masterminding such an admirable source of information and inspirational ideas." —Stephen Kai-yin Wong, Barrister, Secretary of the Law Reform Commission of Hong Kong "In this collection of essays the learned editors—Tilbury, Young and Ng—have drawn together an outstanding group of authors, representing many years of experience in law reform across the common law world. From the UK, Canada, Australia and Hong Kong, the insights of the authors are both reflective and forward-looking, providing a rich resource towards 'reforming law reform'." —Professor Rosalind Croucher, President, Australian Law Reform Commission

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Red Green's Beginner's Guide to Women Red Green 2013-09-17 Red Green is celebrated as one of the handiest men in North America. But as well as being a purveyor of inventive practical advice on, for example, making a jetpack from two propane tanks, a hybrid car from recycled golf carts and satellite dishes, and a kiddie ride from a bar stool attached to the agitator of a washing machine, Red Green is also noted for his insights into that most difficult of assembly jobs, human relationships. His previous bestselling tome, *How to Do Everything*, showed Red dipping his toe into the self-help genre with such items as "How to make dinner more romantic" and "The easy way to raise children." Now *Red Green -- a veteran husband (of Bernice), father, soul-searcher, philosopher and observer -- has devoted an entire book to sharing with other battle-weary and confused males all he has learned about the differences between the sexes. Set out in approximately chronological order, from teen dating to the last words of men ("You know, honey, in the last couple of years, you've really packed on the beef"), this is the testosterone owner's manual to every aspect of finding a mate and then learning to deal with her growing disappointment in you. The man who has already*

shared such morsels as "If you can't be handsome, be handy" and "Quando omni flunkus moritati" ("When all else fails, play dead") here presents a PhD in life-lessons about the most vexing problem facing mankind today, or any day: women.

Financial Intelligence, Revised Edition Karen Berman 2013-02-19 Explains what business numbers mean and why they matter, and addresses issues that have become more important in recent years, including questions about the financial crisis and accounting literacy.

The Coming Cataclysm Reuven P. Bulka 1984

The World Göran Therborn 2013-04-26 What is the world of the 21st century like now that the centrality of the West is no longer given? How were the societies and cultures of today's world together with their interconnections forged, and what is driving human society in our times? In short, what is the state of the world today as we enter the second decade of the 21st century? This is the first book which deals with planetary human society as whole. It is a beginner's guide to the world after the West and after globalization, compact, portable, and jargon-free. It is aimed at everybody who, even with experience, has kept a beginner's curiosity of the world, to everybody who does not know everything they want to know about it, about the good, the evil, and the salvation of the world. It lays bare the socio-cultural geology of the world, its major civilizations, its historical waves of globalization, its family-sex-gender systems, and its pathways to modernity. It outlines the dynamics of the world, its basic drives, the contours of its most important global and sub-global processes. It presents the big team players on the world stage, populous as well as rich countries, missions and movements as well corporations and cities. It traces the life-courses of men and women on all the continents, from their birth and childhood to their old age, and their funeral.

Mission Rift David E. Woolverton 2021-07-06 There are two types of conflict in congregations: conflict that kills and conflict that cultivates growth. So argues David E. Woolverton in Mission Rift: Leading through Church Conflict. Conflict that kills--that damages or destroys teams, ministries, missions, vibrancy--occurs when we as the people of God forget who we are, why we're here, and where we're going in carrying out the divine mission. Conflict that cultivates growth often begins with the same scenarios, but leaders see conflict as a context for learning how to live together as a people called to transform their neighborhoods, schools, and workplaces. In Mission Rift, Woolverton reorients our view of congregational conflict. In part 1, he examines conflict from a theological and ecclesiological framework, exploring why it is essential to discipleship and mission. In part 2, he presents six principles of missional leadership, challenging pastors and other leaders to define themselves within the frameworks of spiritual formation and family systems, and then to create environments that facilitate growth in faith communities. Rather than resolve conflict too quickly, Woolverton explains, lest we inadvertently sabotage the potential it has to draw a congregation toward spiritual growth, wise leaders recognize that a lack of conflict may be a symptom of missional decline, rather than congregational unity. When the church pursues its divine mission first, conflict may become essential for defining its mission priorities. Successfully leading through conflict toward a transformative end will empower a congregation's witness within its community and beyond.

Uganda Philip Briggs 2013 Somebody once said that if you planted a walking stick overnight in the soil of Uganda, it would take root before morning dawned. Of all Africa's safari destinations, this is the most fertile. It's also the best destination in Africa for seeing a variety of primate species - visitors can spot more than ten types of monkey including mountain gorillas and chimpanzees. And if primate enthusiasts are found wandering round with imbecile grins, Uganda's birds have ornithologists doing cartwheels: more than 1,000 bird species have been recorded here making Uganda, in practical terms, the finest birdwatching destination in Africa. Moreover, in Uganda's premier savanna reserves, one can be almost certain of encountering lions, elephants and buffaloes. Whether visitors want to climb to the snows of the fabled Mountains of the Moon, raft the headwaters of the mighty Nile, or marvel at the legendary tree-climbing lions of Ishasha, this seventh edition of Philip Briggs' much-praised guide is the most comprehensive resource available.

Learn You Some Erlang for Great Good! Fred Hebert 2013-01-13 Erlang is the language of choice for programmers who want to write robust, concurrent applications, but its strange syntax and functional design can intimidate the uninitiated. Luckily, there's a new weapon in the battle against Erlang-phobia: Learn You Some Erlang for Great Good! Erlang maestro Fred Hébert starts slow and eases you into the basics: You'll learn about Erlang's unorthodox syntax, its data structures, its type system (or lack thereof!), and basic functional programming techniques. Once you've wrapped your head around the simple stuff, you'll tackle the real meat-and-potatoes of the language: concurrency, distributed computing, hot code loading, and all the other dark magic that makes Erlang such a hot topic among today's savvy developers. As you dive into Erlang's functional fantasy world, you'll learn about: –Testing your applications with EUnit and Common Test –Building and releasing your applications with the OTP framework –Passing messages, raising errors, and starting/stopping processes over many nodes –Storing and retrieving data using Mnesia and ETS –Network programming with TCP, UDP, and the inet module –The simple joys and potential pitfalls of writing distributed, concurrent applications Packed with lighthearted illustrations and just the right mix of offbeat and practical example programs, Learn You Some Erlang for Great Good! is the perfect entry point into the sometimes-crazy, always-thrilling world of Erlang.

Malawi Philip Briggs 2013 This is the only standalone guidebook to the self-styled 'Warm Heart of Africa'. Accessible, affordable and tranquil, Malawi is dominated by the scenic splendour of Lake Malawi, running for 500km through the Great Rift Valley. Elsewhere are numerous little-visited mountains, forests, game reserves and rock art

sites. This updated covers everything from wildlife viewing and lakeshore idylls to the best lodgings and eateries for all budgets as well as several significant political changes. Important developments include the conversion of Majete Game Reserve to a fenced 'Big Five' reserve with a world class safari camp.

The Great Rift Valley of East Africa 2008 In a pictorial journey across the length and breadth of the East African section of the Great Rift Valley, award-winning wildlife photographers Anup and Manoj Shah explore the diversity of habitats created by this great fissure in the Earth

The Rift Alex Perry 2015-11-17 A vivid, powerful, and controversial look at how the world gets Africa wrong, and how a resurgent Africa is forcing it to think again. Africa has long been misunderstood -- and abused -- by outsiders. Correspondent Alex Perry traveled the continent for most of a decade, meeting with entrepreneurs and warlords, professors and cocaine smugglers, presidents and jihadis. Beginning with a devastating investigation into a largely unreported war crime-in 2011, when the US and the major aid agencies helped cause a famine in which 250,000 Somalis died-he finds Africa at a moment of furious self-assertion. To finally win their freedom, Africans must confront three last false prophets-Islamists, dictators and aid workers-who would keep them in their bonds. Beautifully written, intimately reported, and sure to spark debate, The Rift passionately argues that a changing Africa revolutionizes our ideas of it, and of ourselves.

The Rift Hilda Bernstein 1994 A record of the South Africans who left South Africa and the apartheid regime by choice or necessity.

The Philosophers' Quarrel Robert Zaretsky 2009 The rise and spectacular fall of the

friendship between the two great philosophers of the eighteenth century, barely six months after they first met, reverberated on both sides of the Channel. As the relationship between Jean-Jacques Rousseau and David Hume unraveled, a volley of rancorous letters was fired off, then quickly published and devoured by aristocrats, intellectuals, and common readers alike. Everyone took sides in this momentous dispute between the greatest of Enlightenment thinkers. In this lively and revealing book, Robert Zaretsky and John T. Scott explore the unfolding rift between Rousseau and Hume. The authors are particularly fascinated by the connection between the thinkers' lives and thought, especially the way that the failure of each to understand the other—and himself—illuminates the limits of human understanding. In addition, they situate the philosophers' quarrel in the social, political, and intellectual milieu that informed their actions, as well as the actions of the other participants in the dispute, such as James Boswell, Adam Smith, and Voltaire. By examining the conflict through the prism of each philosopher's contribution to Western thought, Zaretsky and Scott reveal the implications for the two men as individuals and philosophers as well as for the contemporary world.

Rift Peter Cole 1989 Poetry. In its sharp ear for everyday speech and fascination with the realms that lie beneath the surface of ordinary reality, the lyric poetry of Peter Cole elegantly carries forward a powerful American tradition that merges the visionary with the immediacy of direct experience--a lineage carried from Emily Dickinson and W.C. Williams into the broad possibilities of the present. In the long poems and lyrics of this collection, a poignant vision emerges--of Jerusalem, the Bible, Jewish liturgical writing, and of the secular mystery hidden in the Hebrew tradition. Originally published in a special artist's edition, the much acclaimed RIFT presents an original voice of the highest intensity.

The Jordan Rift Valley Aharon Horowitz 2001-01-01 Delivering a synthesis of almost one hundred and fifty years of research into the Jordan Rift Valley, this genuinely comprehensive text presents a model explaining the tectonic evolution of this part of the Syrian-African Rift Valley, which may affect opinions regarding the geotectonic

pattern of the entire western Levant. Also including datings and paleoenvironmental reconstructions for all important phases in the history of the Jordan Valley, particular focus is placed on the last two million years, when numerous habitation sites, the oldest of which represents the initial spread of Man out of Africa, indicate the region was almost continuously populated.

Extreme Hydrology and Climate Variability Assefa M. Melesse 2019-07-03 Extreme Hydrology and Climate Variability: Monitoring, Modelling, Adaptation and Mitigation is a compilation of contributions by experts from around the world who discuss extreme hydrology topics, from monitoring, to modeling and management. With extreme climatic and hydrologic events becoming so frequent, this book is a critical source, adding knowledge to the science of extreme hydrology. Topics covered include hydrometeorology monitoring, climate variability and trends, hydrological variability and trends, landscape dynamics, droughts, flood processes, and extreme events management, adaptation and mitigation. Each of the book's chapters provide background and theoretical foundations followed by approaches used and results of the applied studies. This book will be highly used by water resource managers and extreme event researchers who are interested in understanding the processes and teleconnectivity of large-scale climate dynamics and extreme events, predictability, simulation and intervention measures. Presents datasets used and methods followed to support the findings included, allowing readers to follow these steps in their own research Provides variable methodological approaches, thus giving the reader multiple hydrological modeling information to use in their work Includes a variety of case studies, thus making the context of the book relatable to everyday working situations for those studying extreme hydrology Discusses extreme event management, including adaption and mitigation

Adventure Games Aaron A. Reed 2020-02-20 The genre of adventure games is frequently overlooked. Lacking the constantly-evolving graphics and graphic violence of their counterparts in first-person and third-person shooters or role-playing games, they are often marketed to and beloved by players outside of mainstream game communities. While often forgotten by both the industry and academia, adventure games have had (and continue to have) a surprisingly wide influence on contemporary games, in categories including walking simulators, hidden object games, visual novels, and bestselling titles from companies like Telltale and Campo Santo. In this examination of heirs to the genre's legacy, the authors examine the genre from multiple perspectives, connecting technical analysis with critical commentary and social context. This will be the first book to consider this important genre from a comprehensive and transdisciplinary perspective. Drawing upon methods from platform studies, software studies, media studies, and literary studies, they reveal the genre's ludic and narrative origins and patterns, where character (and the player's embodiment of a character) is essential to the experience of play and the choices within a game. A deep structural analysis of adventure games also uncovers an unsteady balance between sometimes contradictory elements of story, exploration, and puzzles: with different games and creators employing a multitude of different solutions to resolving this tension.
