Rudolf Steiner Roy Wilkinson 2001 In many ways, Rudolf Steiner is the forgotten genius of recent times. A powerful thinker, who developed an intricate spiritual philosophy based on his ability to research and perceive spiritual dimensions, Steiner is perhaps best known today for his legacy to education, medicine and agriculture. But behind these practical manifestations of his ideas lies a profound teaching, which he termed a science of spirit, or anthroposophy. In these wonderfully succinct summaries of Steiner's thought, Roy Wilkinson introduces us to aspects of this spiritual philosophy. The twelve chapters discuss: Rudolf Steiner, herald of a new age reincarnation and karma The spiritual nature of the human being The development of human consciousness World and human evolution Relationships between the living and the dead Forces of evil A modern path of initiation Life between death and rebirth The spiritual hierarchies Philosophical approach to the spirit The Christ's mission Illustrated.

The View from Cracker Hill Bettejane Synott Wesson 2008-08-01 The View From Cracker Hill describes life in Waterbury, Connecticut, Brass Capitol of the World, in the 1950s. it's a story told from the perspective of a young girl living in the inner city five blocks north of downtown in a section known as Cracker Hill. It's not a comprehensive history of place and

time, but it's a lot of fun to read. The author's impression of city happenings, family events and Catholic school are told with humor and a growing awareness of the chances brought to her own town by the post war economy. But whether she's describing an air raid drill or a trip to Woolworth's her love for her subject is obvious. She says, "People sometimes ask, 'What do you see in Waterbury?' For me, it's not simply about memories, the way it was in my beloved past. It's also about Waterbury's potential, what it could be one day yet to come."

The Parallax View Slavoj Žižek 2009-02-13 In Žižek's long-awaited magnum opus, he theorizes the "parallax gap" in the ontological, the scientific, and the political—and rehabilitates dialectical materialism. The Parallax View is Slavoj Žižek's most substantial theoretical work to appear in many years; Žižek himself describes it as his magnum opus. Parallax can be defined as the apparent displacement of an object, caused by a change in observational position. Žižek is interested in the "parallax gap" separating two points between which no synthesis or mediation is possible, linked by an "impossible short circuit" of levels that can never meet. From this consideration of parallax, Žižek begins a rehabilitation of dialectical materialism. Modes of parallax can be seen in different domains of today's theory, from the wave-particle duality in quantum physics to the parallax of the unconscious in Freudian psychoanalysis between interpretations of the formation of the unconscious and theories of drives. In *The Parallax View*, Žižek, with his usual astonishing erudition, focuses on three main modes of parallax: the ontological difference, the ultimate parallax that conditions our very access to reality; the scientific parallax, the irreducible gap between the phenomenal experience of reality and its scientific explanation, which reaches its apogee in today's brain sciences (according to which "nobody is home" in the skull, just stacks of brain meat—a condition Žižek calls "the unbearable lightness of being no one"); and the political parallax, the social antagonism that allows for no common ground. Between his discussions of these three modes, Žižek offers interludes that deal with more specific topics—including an ethical act in a novel by Henry James and anti-anti-Semitism. *The Parallax View* not only expands Žižek's Lacanian-Hegelian approach to new domains (notably cognitive brain sciences) but also provides the systematic exposition of the conceptual framework that underlies his entire work. Philosophical and theological analysis, detailed readings of literature, cinema, and music coexist with lively anecdotes and obscene jokes.

A Room with a View Illustrated E M Forster 2020-01-05 "A Room with a View is a 1908 novel by English writer E. M. Forster, about a young woman in the restrained culture of Edwardian era England. Set in Italy and England, the story is both a romance and a humorous critique of English society at the beginning of the 20th century. Merchant Ivory produced an award-winning film adaptation in 1985. The Modern Library ranked *A Room with a View* 79th on its list of the 100 best English-language novels of the 20th century (1998)."

All Mario wanted was to go to prom...but somehow, he ended up in hell.

The (Mis)Behaviour of Markets Benoit B. Mandelbrot 2008 This international bestseller, which foreshadowed a market crash, explains why it could happen again if we don't act now. Fractal geometry is the mathematics of roughness: how to reduce the outline of a jagged leaf or static in a computer connection to a few simple mathematical properties. With his fractal tools, Mandelbrot has got to the bottom of how financial markets really work. He finds they have a shifting sense of time and wild behaviour that makes them volatile, dangerous - and beautiful. In his models, the complex gyrations of the FTSE 100 and exchange rates can be reduced to straightforward formulae that yield a much more accurate description of the risks involved.

VIEW MASTER Gretchen Jane Gruber 2015-03-01 William B. Gruber, inventor of the 3D stereoscopic device, the View-Master, lived a life as colorful and vibrant as the images he captured in his photos. The story tells of events leading up to his kidnapping off the streets of Munich by the Red Army, his rigorous training as a piano builder, and the lucky break that brought him to America. His political activities in the 1920's caught the attention of the FBI's J. Edgar Hoover, which led to a trial for possible espionage. Later, he would go on to help US forces win the war. Interpreting Quantum Mechanics Lars-Göran Johansson 2007-01-01 Presenting a realistic interpretation of quantum mechanics and, in particular, a realistic view of quantum waves, this book defends, with one exception, Schrodinger's views on quantum mechanics. Johansson goes on to defend the view that the collapse of a wave function during a measurement is a real physical collapse of a wave and argues that the collapse is a consequence of quantisation of interaction. Lastly Johansson argues for a revised principle of individuation in the quantum domain and that this principle enables a sort of explanation of non-local phenomena.

Baptism David F. Wright 2009-11-16 The Christian church confesses "one baptism." But the church's answers to how, whom and when to baptize, and even what it means or does, are famously varied. This book provides a forum for thoughtful proponents of three principal evangelical views to state their case, respond to the others, and then provide a summary response and statement. Sinclair Ferguson sets out the case for infant baptism, Bruce Ware presents the case for believers' baptism, and Anthony Lane argues for a mixed practice. As with any good conversation on a controversial topic, this book raises critical issues, challenges preconceptions and discloses the soft points in each view. Evangelicals who wish to understand better their own church's practice or that of their neighbor, or who perhaps are uncertain of their own views, will value this incisive book.

A Constitutional View of the Late War Between the States Alexander Hamilton Stephens 2007 A Georgian, Alexander Hamilton Stephens [1812-1883] was Vice President of the Confederate States of America during the Civil War. He was a U.S. congressman from Georgia before the war and its governor from 1882 until his death in 1883. A Constitutional View is a sophisticated and well-argued defense of the doctrine of state sovereignty and the right of states to secede. The book "was a sensation in its day, evoking attacks by Northern and Southern champions of causes upon which it impinged.": Dictionary of American Biography IX:574.

Enjoy the View Sarah Morgenthaler 2021-01-19 A grouchy mountaineer, a Hollywood starlet And miles of untamed wilderness... What could possibly go wrong? Former Hollywood darling River Lane's acting career is tanking fast. Determined to start fresh behind the camera, she agrees to film a documentary about the picturesque small town of Moose Springs, Alaska. The assignment should have been easy, but the quirky locals want nothing to do with River. Well, too bad: River's going to make this film and prove herself, no matter what it takes. Or what (literal) mountain she has to climb. Easton Lockett may be a gentle giant, but he knows a thing or two about survival. If he can keep everyone in line, he should be able to get River and her crew up and down Mount Veil in one piece. Turns out that's a big if. The wildlife's wilder than usual, the camera crew's determined to wander off a cliff, and the gorgeous actress is fearless. Falling for

River only makes Easton's job tougher, but there's only so long he can hold out against her brilliant smile. When bad weather strikes, putting everyone at risk, it'll take all of Easton's skill to get them back home safely...and convince River she should stay in his arms for good. Prince Afshin Shahidi 2017-10-24 Featuring a foreword by Beyoncé Knowles-Carter. When Prince wanted to document his *One Nite Alone* tour in 2002, he turned to Afshin Shahidi. Again in 2004, he went along on Prince's record breaking *Musicology Tour*. Afshin met Prince in 1989 and became his cinematographer and later his photographer. He was the photographer closest to Prince for the last fifteen years of Prince's life. Afshin is the only photographer to shoot the legendary 3121 private parties in Los Angeles that became the most sought after invitations in Hollywood. *Prince: A Private View* compiles his work into a journey through Prince's extraordinary life. With many never-before-seen photos, this is the ultimate collection of – some intimate, some candid, some in concert – shots of Prince, but all are carefully directed in the artist-as-art style that we associate with him. Deep photo captions are brief, but complete stories about Prince's life at that moment - some are incisive, others are personal and even funny.

Overdevelopment, Overpopulation, Overshoot Tom Butler 2015-02-17 "Every major problem facing humanity is exacerbated by a needlessly ballooning human population. So why is the explosive growth of the human family--more than sevenfold since the Industrial Revolution and still expanding rapidly--generally ignored by policy makers and the media? And why has the environmental movement chosen to be mostly silent about the fundamental driver of species loss and the destruction of wildlife habitats around the globe? Isn't it time to start speaking out about the equation that matters most to the future of people and the planet? The publication centerpiece of the Global Population Speakout campaign, Overdevelopment, Overpopulation, Overshoot ("OVER") moves beyond insider debates and tired arguments (human numbers and overconsumption are both responsible for the crisis of population overshoot). Anchored by a series of provocative photo essays, OVER presents the stark reality of a world transformed by human action, action that threatens our future and the buzzing, blossoming diversity of life with which we share the planet."--Publisher website.

Machine Learning for Risk Calculations Ignacio Ruiz 2021-12-28 State-of-the-art algorithmic deep learning and tensoring techniques for financial institutions The computational demand of risk calculations in financial institutions has ballooned and shows no sign of stopping. It is no longer viable to simply add more computing power to deal with this increased demand. The solution? Algorithmic solutions based on deep learning and Chebyshev tensors represent a practical way to reduce costs while simultaneously increasing risk calculation capabilities. Machine Learning for Risk Calculations: A Practitioner's View provides an in-depth review of a number of algorithmic solutions and demonstrates how they can be used to overcome the massive computational burden of risk calculations in financial institutions. This book will get you started by reviewing fundamental techniques, including deep learning and Chebyshev tensors. You'll then discover algorithmic tools that, in combination with the fundamentals, deliver actual solutions to the real problems financial institutions encounter on a regular basis. Numerical tests and examples demonstrate how these solutions can be applied to practical problems, including XVA and Counterparty Credit Risk, IMM capital, PFE, VaR, FRTB, Dynamic Initial Margin, pricing function calibration, volatility surface parametrisation, portfolio optimisation and others. Finally, you'll uncover the benefits these techniques provide, the practicalities of implementing them, and the software which can be used. Review the fundamentals of deep learning and Chebyshev tensors Discover pioneering algorithmic techniques that can create new opportunities in complex risk calculation Learn how to apply the solutions to a wide range of real-life risk calculations. Download sample code used in the book, so you can follow along and experiment with your own calculations Realize improved risk management whilst overcoming the burden of limited computational power Quants, IT professionals, and financial risk managers will benefit from this practitioner-oriented approach to state-of-the-art risk calculation.

Ladies Who Punch Ramin Setoodeh 2019-04-02 THE INSTANT NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER Like Fire & Fury, the gossipy real-life soap opera behind a serious show. When Barbara Walters launched The View, network executives told her that hosting it would tarnish her reputation. Instead, within ten years, she'd revolutionized morning TV and made household names of her co-hosts: Joy Behar, Star Jones, Meredith Vieira and Elisabeth Hasselbeck. But the daily chatfest didn't just comment on the news. It became the news. And the headlines

barely scratched the surface. Based on unprecedented access, including stunning interviews with nearly every host, award-winning journalist Ramin Setoodeh takes you backstage where the stars really spoke their minds. Here's the full story of how Star, then Rosie, then Whoopi tried to take over the show, while Barbara struggled to maintain control of it all, a modern-day Lear with her media-savvy daughters. You'll read about how so many co-hosts had a tough time fitting in, suffered humiliations at the table, then pushed themselves away, feeling betrayed—one nearly quitting during a commercial. Meanwhile, the director was being driven insane, especially by Rosie. Setoodeh uncovers the truth about Star's weight loss and wedding madness. Rosie's feud with Trump. Whoopi's toxic relationship with Rosie. Barbara's difficulty stepping away. Plus, all the unseen hugs, snubs, tears—and one dead rodent. Ladies Who Punch shows why The View can be mimicked and mocked, but it can never be matched.

View Synthesis Using Stereo Vision Daniel Scharstein 1999-06-09 Image-based rendering, as an area of overlap between computer graphics and computer vision, uses computer vision techniques to aid in synthesizing new views of scenes. Image-based rendering methods are having a substantial impact on the field of computer graphics, and also play an important role in the related field of multimedia systems, for applications such as teleconferencing, remote instruction and surgery, virtual reality and entertainment. The book develops a novel way of formalizing the view synthesis problem under the full perspective model, yielding a clean, linear warping equation. It shows new techniques for dealing with visibility issues such as partial occlusion and "holes". Furthermore, the author thoroughly re-evaluates the requirements that view synthesis places on stereo algorithms and introduces two novel stereo algorithms specifically tailored to the application of view synthesis.

The Long View Brian Fetherstonhaugh 2016-09-06 The Chairman & CEO of OgilvyOne Worldwide and career advisor extraordinaire, Brian Fetherstonhaugh, outlines the three stages of a long, successful work life and offers guidance to plan ahead and get the most out of each phase. The world of careers is vastly different than it was just five years ago—more choices, more competition, and relentless change in how we define work-life. It can be difficult to understand our options and plan for a prosperous future. Where can you go for answers? Colleges may teach us academic and technical skills, and there are places to look for tips on how to write a resume or prep for a job interview. But is it enough? Brian Fetherstonhaugh, CEO of OgilvyOne Worldwide, understands this dilemma and how to navigate it. He believes we need more than tactics—we need robust, road-tested strategies that combine old-school wisdom with new-school context so that we can flourish in the new professional reality. In The Long View, Fetherstonhaugh shows us the three distinct but interconnected stages of a career, and how we build 'fuel' at every step along the way to create long-term success. The

Long View teaches us new ways of finding jobs, new methods to build careers that last, and a new definition of “work” that embraces life-satisfaction and happiness. The Long View offers highly practical exercises that challenge you to rethink how to assess your skills, invest your time and expand your personal network, and provides a framework for facing tough job decisions. With insights drawn from interviews with a variety of professionals—who share both success stories and cautionary tales—The Long View will help you establish your own path for overcoming obstacles and making the best choices for a long, accomplished, and rewarding career. “THE LONG VIEW is one of the most practical and comprehensive guides to a meaningful career that I have read. Whether you are just starting your search for a job or trying to get a career back on track, start by reading The Long View.”—Tom Rath, best-selling author of ARE YOU FULLY CHARGED?, EAT, MOVE, SLEEP, and STRENGTHSFINDER 2.0 “THE LONG VIEW is the career guide you’ve been looking for—forward-thinking advice from a seasoned business leader. Brian Fetherstonhaugh offers practical exercises, useful advice—and deep insights into what a meaningful career looks and feels like.”—Susan Cain, co-founder of Quiet Revolution and New York Times bestselling author of QUIET: The Power of Introverts in a World That Can’t Stop Talking An Historical, Geographical, and Philosophical View of the Chinese Empire William Winterbotham 1795

Justification James K. Beilby 2011-11-10 "Therefore, since we have been justified by faith, we have peace with God through our Lord Jesus Christ" (Rom 5:1). When Paul wrote these words he seemed confident he had made himself clear. But for centuries the Pauline doctrine of justification has been a classic point of interpretation and debate in Christian exegesis and theology. And while in recent decades there have been moments of hopeful convergence among the various traditions of the Western church, the fine print often reveals more facets and distinctions than ever before. This volume focuses on five views of justification and calls on representative proponents to set forth their case and then respond to each other. The five views are: Traditional Reformed (Michael S. Horton) Progressive Reformed (Michael F. Bird) New Perspective (James D. G. Dunn) Deification, or Theosis (Veli-Matti Kärkkäinen) Roman Catholic (Gerald O. Collins and Oliver Rafferty) In addition, editors James Beilby, Paul R. Eddy and Steven E. Enderlein provide an extensive introduction to the issues informing this important debate. This distinguished forum of biblical interpreters and theologians offers a lively and informative engagement with the biblical, historical and contemporary understandings of justification. Justification: Five Views is not only a fascinating probe into Paul's meaning, it is also a case book in theological method. The Memetics of Music Steven B. Jan 2007 Richard Dawkins's formulation of the meme concept in his 1976 classic *The Selfish Gene* has inspired three decades of work in what many see as the burgeoning science of memetics. This study is the first musicologically-orientated attempt systematically to apply the theory of memetics to music. In contrast to the two points of view normally adopted in music theory and analysis - namely those of the listener and the composer - the

purpose of this book is to argue for a distinct and illuminating third perspective. The perspective is that of the (selfish) replicated musical pattern itself, and adopting it is central to memetics.
